

T - V 10

Vertical Series

General description

The vertical stick-pack model from Totpack is an automatic, vertical form, fill-and-seal machine for productions of up to 400 bags/min. It has been designed for the food, cosmetics and pharmaceutical industries. Products: powder, granulates, liquid and paste. The Stick-Pack is a much better alternative to the conventional square sachet: giving savings of up to 45% in paper and associated costs and greater sachet capacity.

This is a system used for free-flowing products and can be filled by volume. The system comprises a stainless-steel hopper, with a different interchangeable set of cups. This is a filling system for free- and non free-flowing products and for powdery and volatile products. Available in two versions: Servomotor and clutch/brake system.

Vertical Series	T - V 10 Vertical Series
Technical Data	
Production (packs/minute)	60
Dimensions: (width x length)	
• Minimum	17 x 60
• Maximum	74 x 240
Volume c.c. (In each sachet)	250
Consumption	3 Kw*
Voltage	220 / 240 V - Three - phase - Neutral + Ground 50 Hz
Coil Size:	
• Maximum diameter	600
• Maximum width	160
• Core diameter	70 - 75
Machine dimensions	1700 x 1600 x 1400*
Weight	500*
Operators	1

* Without accessories
